
How many light bulbs does it take to change the world?

It starts with just one. Switching to energy-efficient light bulbs is one of many simple actions that, multiplied by millions of people, can have a huge effect on our collective energy consumption. That's why 32 diverse organizations and companies are uniting to challenge policymakers and everyday Americans to use energy more efficiently. The *6° of Energy Efficiency Challenge* highlights easy actions individuals can take to be more energy efficient. **Take the challenge**, share it with your constituents, and enact energy-efficiency policies that improve our environment, economy, and energy security.

The power is in your hands. **SixDegreeChallenge.org**
